

ClearPath 2.0 Implementation Services

Leveraging California's First Implementation Experience

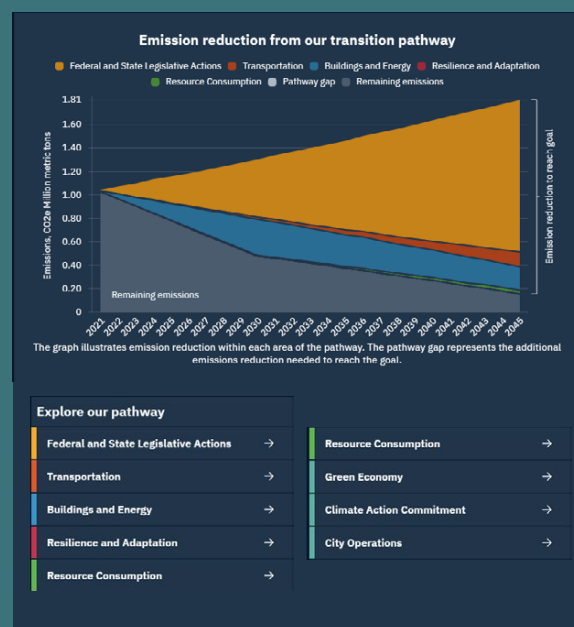

ClearPath 2.0, launched in May 2025 by ICLEI USA and ClimateView, is a comprehensive climate action platform for local governments in the United States. While jurisdictions can implement the platform independently through ICLEI USA, expert guidance can optimize your investment and accelerate results.

As an early partner to ClimateView and the first consultancy to guide a California jurisdiction through ClearPath 2.0 implementation, Ascent is excited to share what we've learned. Through our collaboration with the City of Elk Grove on its Climate Compass initiative, we've gained valuable insights that can benefit other jurisdictions planning their ClearPath 2.0 implementations.

Resources Ascent Offers

- **Platform insights** gained through our ongoing collaboration with ClimateView developers
- **Implementation guidance** based on Elk Grove's successful deployment experience
- **Network connections** to support your implementation journey
- **Emerging best practices** discovered through continuous learning and collaboration
- **Early insights** into platform updates and feature enhancements

Elk Grove Climate Compass in Action

“Working with Ascent's climate experts to implement this innovative platform was instrumental in bringing this vision to life—their deep understanding of both the technology and our community's needs ensured we could deliver a dashboard that truly serves our residents.”

Innovation Program Manager
City of Elk Grove

How We Support ClearPath 2.0 Implementation

Strategic Planning

- Apply lessons learned from successful implementations
- Help you navigate the Transition Elements framework
- Develop realistic interventions based on actual experience
- Anticipate and avoid potential challenges

Capacity Building

- Train your team to collaborate on intervention updates
- Share knowledge from our implementation experience
- Help build internal expertise for long-term success
- Connect with the broader ClearPath 2.0 community

Technical Implementation

- Guide data migration using methods we've tested
- Configure dashboards for maximum impact
- Build a plan from the bottom up
- Support optimal platform setup from day one

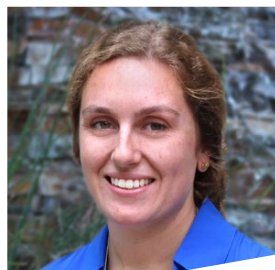

Ongoing Support

- Provide continued guidance as the platform evolves and new modules are added
- Share insights from our expanding implementation portfolio
- Keep you connected to emerging best practices

Ready to explore ClearPath 2.0?

Whether you're just learning about ClearPath 2.0 or ready to move forward, we can help guide your implementation using insights from Elk Grove's success and our ClimateView partnership. Let's discuss how Ascent's implementation services can support your climate planning goals.
